1. CAUTION/WARNINGS

1. Always perform a skin test on the underside of your arm. Never apply wax to broken, irritated, damaged, or inflamed skin.

2. Wax preparation and heating

The wax is hot and must be handled with care. Never put wax on the skin or into your eyes. Keep out of reach of children.

3. Mixing of the wax

Mix the contents of the jar with hot water. The ideal temperature should be between 130°F to 140°F. Be careful not to spill wax on your skin.

4. Patch test

Check a small area of skin before using to determine if you have any adverse reactions to the ingredients. Do not use on sensitive areas such as the face, armpits, or intimate areas.

5. Heating of the wax

Always remove the wax from the jar and add the desired amount of water while the wax is still hot. Add 1/2 cup of water to each pound of wax for even overheating.

6. Wax application

Apply wax in a thin, even layer over the area to be waxed. Make sure the wax is not too hot or too cold. Be careful not to burn or injury.

7. Hair removal

Remove the wax strips and pull the hair out with a quick, upward motion. Do not pull the hair against the natural hair growth direction.

8. Tips for areas to be waxed

LEG HAIR REMOVAL

Apply wax to the desired area and leave it on the skin for 2-3 minutes. Remove the wax with your hand in a downward direction.

UNDERARM HAIR REMOVAL

Apply wax to the desired area and leave it on the skin for 2-3 minutes. Remove the wax with your hand in a downward direction.

BIKINI HAIR REMOVAL

Apply wax to the desired area and leave it on the skin for 2-3 minutes. Remove the wax with your hand in a downward direction.

9. After hair removal

Rinse the area with warm water and apply aloe vera or coconut oil to soothe the skin. Do not use any perfumed products or fragrances for at least 24 hours.
